

Launch AI-Assisted Documentation in Weeks

Clara.Care for Platforms

Real-time clinical documentation infrastructure for:

- EHR / EMR platforms
- Telemedicine providers
- Healthcare SaaS companies
- Clinical workflow software

EMBEDDED • BILINGUAL • PHYSICIAN-CONTROLLED

<https://clara.care/>

Clara

Physicians Are Increasingly Expecting AI-Assisted Documentation

Rising Pressure for Platforms

Healthcare software platforms are under growing pressure to offer:

- Real-time documentation
- AI-assisted note generation
- Workflow automation
- Better physician experience

The Challenge: Building and maintaining clinical documentation infrastructure internally can require significant engineering investment and ongoing maintenance.

EFFICIENCY • WELL-BEING • PATIENT-CENTRIC

<https://clara.care/>

Clara

Keep Physicians Inside Your Workflow

Clara is an assistive layer, not another application.

Without Clara

Doctor → Consultation → Manual Documentation

Result: Increased administrative burden and more time spent away from patients.

With Clara

Doctor → Consultation → Clara Drafts Note

Real-time drafting allows for immediate Review & Approval within the same screen.

No tab switching. No workflow disruption.
The physician stays inside your platform.

Clara

Built for Bilingual Clinical Workflows

Clara bridges the gap in multilingual healthcare environments.

Tailored for Multilingual Success

While most solutions prioritize English, Clara is natively optimized for:

- English & Spanish consultations
- Mixed-language environments
- LATAM healthcare workflows
- Cross-border telemedicine

Deploy AI-assisted documentation with confidence for bilingual physician populations.

Multiple Integration Paths

```
Widget Integration: Medical Transcription
index.html x widget.js styles.css Copy Settings Preview
1 <div id="medical-transcription-widget"></div>
2 <script src="http://med-transcribe-api.com/v1/widget.js" async></script>
3
4 MedTranscribeWidget.init({
5   apiKey: 'YOUR_API_KEY_HERE',
6   patientId: 'P_749321',
7   doctorId: 'D_5531',
8   mediaSource: true,
9   container: '#medical-transcription-widget'
10 });
```

Medical Transcription - patient: 749321 | Dr. Anya Sharma

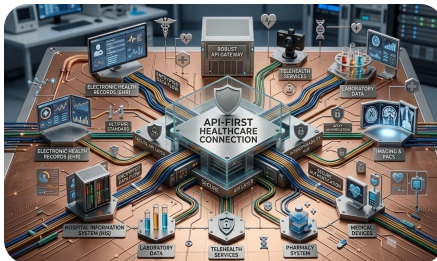

Rec | Pause | Clear | Save

[00:01:23] Patient presents with a 3-day history of localized left lower quadrant abdominal pain, sharp but intermittent.
[00:03:40] No associated fever, nausea, or significant change in bowel habits reported.
[00:05:12] Physical examination reveals focal tenderness to palpation in the LLQ without rebound or guarding. No palpable masses.
[00:06:55] A working diagnosis of mild, uncomplicated diverticulitis is considered.
[00:07:50] A CT scan of the abdomen and pelvis with IV contrast has been ordered.
[00:09:10] Dictation continues...

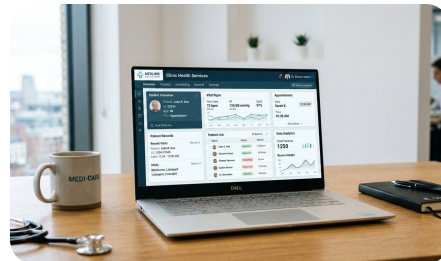

Embedded Widget

Fastest deployment path. Integrate Clara directly inside your existing workflow.

API-First Integration

Custom user experiences powered by Clara.

White-Label Options

Deliver documentation capabilities under your own brand.

Live Integration Playground

Explore implementation options and workflows immediately: <https://playground.clara.care/>

Security, Privacy & Compliance

Healthcare requires trust. Clara is designed for it.

Core Compliance & Encryption

- ✓ HIPAA-aware architecture
- ✓ Encryption in transit and at rest
- ✓ Access controls

Trust & Validation

- ✓ Auditability & Traceable documentation
- ✓ Physician review before finalization

Every generated note remains under physician control.

Pilot Timeline

Week 1

Integration Setup

- Widget or API deployment
- Workflow configuration

Week 2

Internal Testing

- Clinical validation
- User acceptance testing

Week 3

Limited Physician Pilot

- Real consultations
- Real workflows
- Real feedback

Week 4

Review & Iterate

- Adoption metrics
- Workflow refinements
- Scale decision

Goal

Validate physician adoption quickly before committing significant engineering resources.

Partner Economics

Flexible commercial models designed for value-added growth.

Revenue Share

Partner bills customers directly and shares a percentage of revenue with Clara.

Wholesale Pricing

Partner purchases usage capacity in bulk and bundles Clara into existing plans.

Per Provider Pricing

Simple, predictable economics based on the number of clinicians using the platform.

Enterprise Licensing

Custom agreements and tiered pricing for large healthcare networks and health systems.

Clara is designed to become a value-added feature, not simply another software expense.

Why Healthcare Platforms Choose Clara

Launch clinical AI in weeks, not years.

Accelerate Time-to-Market

Launch faster and validate demand before committing major engineering resources.

Elevate Physician Experience

Reduce documentation effort and support bilingual users with native-level AI.

Product Differentiation

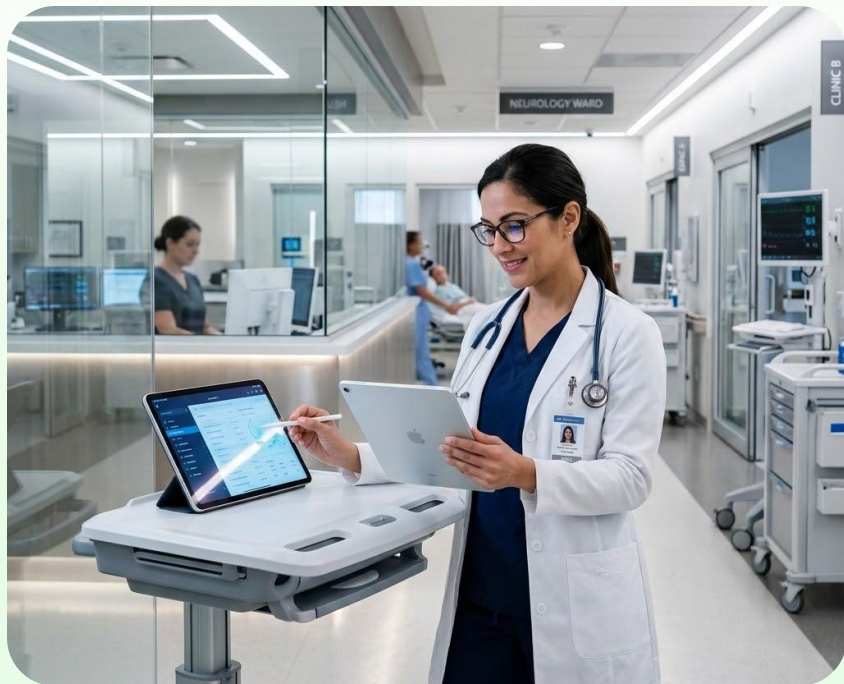

Differentiate your platform by letting Clara handle complex documentation infra.

Focus your team on your core platform. Let Clara handle the infrastructure.

Clara

Let's Explore a Pilot

Real-time clinical documentation infrastructure for healthcare platforms.

We're looking for:

- EHR / EMR providers
- Telemedicine platforms
- Healthcare SaaS companies
- Clinical workflow software vendors

Ideal partners:

- ✓ Existing physician user base
- ✓ Interest in AI-assisted documentation
- ✓ Ability to run a small pilot
- ✓ Focus on physician workflow improvement
